

TRAINING OPPORTUNITY

Field Hydrology Training

The Montana Department of Natural Resources and Conservation (DNRC) Water Science Bureau is hosting a full-day, -hands-on field hydrology training. Participants will learn about a variety of hydrologic field applications, including surface and groundwater measurement techniques, and will gain an understanding of irrigation practices common throughout Montana.

Training Topics Include:

- Irrigation Techniques
- Groundwater Monitoring and Measurements
- Surface Water Measurements, including:
 - Flumes and Weirs
 - Stream Gages and Rating Curves
 - FlowTrackers and Flow Meters
 - Unique Situations and Other Methods

Location:

Helena, MT

Date:

June 2, 2026

Cost:

\$50

Additional Information:

- Open to all. This workshop is ideal for someone interested in gaining exposure to water measurement techniques and field hydrology.
- A detailed agenda will be provided closer to the training.
- Lunch, snacks, equipment and field transportation will be provided.
- Registration is limited.

Registration Closes: May 15, 2026
